Lotus Tray Automatic Loading / Unloading Line

The shaped dough pieces coming out from the long moulder are placed on the wooden palate/tray in options of single, double or triple rows as programmed. The all new, highly intelligent, BROTMAS Automatic Tray Loading/Unloading Line, efficiently picks up the tray, loads it on to the trolley & simultaneously gets the next empty tray ready for loading. Thanks to it's reliable conveyor belt, the task seems effortless. When the process of loading all the trays is completed onto the trolley it automatically moves forward towards the exit and is replaced by another empty trolley to be loaded.
